DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims the prior art fails to teach or suggest a method and an apparatus of correction of A/D converted output data for correcting digital data obtained by A/D conversion of an analog signal, comprising: forming at least a first order approximation polynomial curve approximating an input/output characteristic curve of A/D conversion, setting an ideal input/output characteristic line corresponding to the input/output characteristic curve of A/D conversion, and deriving a conversion equation for converting coordinates of a point on the approximation polynomial curve to coordinates of a point on the ideal input/output characteristic line corresponding to the same analog signal value as called for in claims 1, 10 and 20. Therefore, claims 1-20 are presently allowed.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
